## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the **first paragraph of 35 U.S.C. 112**:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 18 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 18 recites "the first groove portion has a gradually reducing depth from the boundary line to the first outer shape and the second groove portion has a gradually reducing depth from the boundary line to the second outer shape". Applicant's invention as shown in figure 4 only shows the general piston groove depth in relation to COP. Such range is clearly marked as "range of invention". There is no specific either on the drawing or on the rest of the specification as originally filed that relates the depth parameter to the boundary line, the first outer shape and the second outer shape.

Applicant is required to cancel the new matter in the reply to this Office Action.

3. The following is a quotation of the **second paragraph of 35 U.S.C. 112**:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. In re claim 16, line 2-3 recites "a widest portion of the groove" which is indefinite since it can not be ascertained to which groove applicant is referring to. Please note that claim 6 recites "grooves are provided" and that "the grooves include first groove portion" and "second groove portions".

***Response to Arguments***

6. Applicant's arguments with respect to claims 1-3 and 5-15 have been considered but are moot in view of the fact that the claims are indicated as being allowable except a rejection under 35 U.S.C. 112, first and second paragraph related to claim amendment.

***Allowable Subject Matter***

7. Claims 1-3,5-15,17 are allowable.

The prior art of record fail to teach a groove formed on upper and lower side of a piston wherein the outer shapes of the grooves is a closed semicircular shape extending toward a skirt side of the piston.

Claims 16 and 18 would be allowable if rewritten to overcome the rejection under 35 U.S.C. 112, first and second paragraph, set forth in this Office action.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
